## HYDROPOWER'S VISION FOR GROWTH

### PATHWAYS FOR INCREASING HYDROPOWER GENERATION

Today, clean and renewable hydropower provides energy to over 30 million American homes. As impressive as that sounds, its growth potential is immense. New analysis from the U.S. Department of Energy's Hydropower Vision Report found that hydropower can sustainably **grow its current 101 gigawatts (GW) of capacity by nearly 50 GW by 2050.**

AS A NATION, WE HAVE A CLEAR CHOICE TO MAKE ABOUT OUR CLEAN ENERGY FUTURE:  
**STAND STILL OR UNLOCK HYDROPOWER'S POTENTIAL**
